

Success Story of Nismaan organization

my name is sireesha Annareddy and I am from a Ponnur in Guntur. my Parents are farmers. we are two siblings in the family. my parents work very hard to give us what we need and support us in whatever we want to do. I always wanted to get a job as soon as possible and support my father and make my happy family.

That's when I came to know about Nismaan and its training program. I called Sudheer Sir and he supported me a lot. I learned HTML, CSS, Bootstrap, JavaScript, Angular. The course was very useful and Priyanka madam's teaching is good. A part from technical classes they had provided communication classes on personality development, communication skills, resume building and interview skills.

The placement assistance was really nice and they encouraged me a lot. They shared lots of information and scheduled interviews to attend. Now

A big thanks to Microsoft-Nirmaan organization management and Microsoft especially for supporting us like this with free training and placement.
